

FACTSHEET

Full Circle

Resetting Global Development. One Year On.

21 September 2026

New York Marriott Marquis

From 16:00 EDT

What it is

Full Circle is Accra Reset's convening on the margins of the 81st United Nations General Assembly. One year after the initiative's New York launch, it brings political leaders and partners together to turn a call for more balanced global cooperation into practical programmes and negotiated partnerships.

The proposition

Accra Reset treats sovereignty as practical capability: the power to set priorities, mobilise resources, build institutions and deliver. Its response to geostrategic marginalisation, geopolitical vulnerability and donor dependence connects political authority, productive capability and financial resilience.

What the evening brings together

Health reform. The High-Level Panel report, A Sovereign Future for Health.

A standing negotiating table. The Global Reset Dialogues.

Capability in practice. Masterkey, SIGN, Mother Africa and BUMBY.

Public purpose and enterprise. The discussion on Sovereign Prosperity Spheres.

Beyond the announcements

Accra Reset goes way beyond another catalogue of pledges. It is cooperation with clear responsibilities, stronger country and regional capability, and accountability for delivery. The Presidential Council provides political direction while the Guardians' Circle contributes stewardship. The programme and initiative factsheets are available through this event hub.

Ownership with control. Cooperation with responsibility.
